### **Statistics in the Community (STATCOM)**

STATCOM@UMICH is a community outreach program provided to the greater Ann Arbor area by graduate students in the Departments of Biostatistics, Statistics, and the Program for Survey Methodology at University of Michigan. The program offers the expertise of statistics graduate students, free of charge, to non-profit governmental and community organizations in the areas of data organization, analysis, and interpretation. The members of STATCOM are pleased to be working with you on this project.

### **Services Provided by STATCOM@UMICH**

Advice and assistance are offered on a wide variety of statistical issues including:

- Use of data to improve decision making processes
- Survey/sample design and analysis
- Design and analysis of studies and experiments
- Graphical methods of summarizing and gaining meaning from data
- Use of data to detect trends and make predictions and projections.

STATCOM is able to assist with study design, data analysis, and the interpretation of results, but does not have the resources to collect or enter data.

### **Contacting STATCOM@UMICH**

Feel free to contact STATCOM@UMICH at [mrelliot@umich.edu](mailto:mrelliot@umich.edu) or (734) 647-5160 if you have any questions.

### **Client Confidentiality**

Consultants will not discuss a project with any person outside of STATCOM@UMICH without the client's consent.

### **Conclusion of the Project**

A final report and, if requested, a presentation will be made after completing the analysis.
