CURRENT SUPPORT

07/01/2016–06/30/2021

NIH/NHLBI (R01 HL128231-01A1) - Population Effects of Motivation Interviewing on Pediatric Obesity in Primary Care. We will test the effectiveness of an enhanced version of the BMI2 intervention disseminated through 18 PROS practices using Electronic Health Record data. The intervention will include Motivational Interviewing by PCPs and RDs, supplemented with text messaging.

Role: PI

3/1/2016-2/28/2021

Subcontract from UMKC (PI: Cately)

NIH/NHLBI(1 R01 HL126099-01A1)- Adapting the Diabetes Prevention Program for South African Community Health Workers. Adapt the National Diabetes Prevention Program and evaluate its feasibility and effectiveness in an urban settlement community in South Africa using motivational interviewing (MI) delivered by community health workers. I will assist in designing the intervention, training health workers, data collection, analysis, and publication.

Role: Co-I; Subcontract PI

07/01/2015–06/30/2020

Subcontract from Virginia Commonwealth University (PI:Lafata)

NIH/NCI-A Post-Visit Patient Portal Tool to Promote Colorectal Cancer Screening. We are developing a tailored intervention to encourage adults who have been provided a recommendation to obtain CRC screening from their PCPs to follow-up with that recommendation. I am contributing to overall study design, intervention development, instrument selection, and data analyses.

Role: Co-I: Subcontract PI

07/01/2012–06/30/2017

NIH (1-R01-HDO72153)

South Carolina Research Foundation (PI: Dawn Wilson)

The Families Improving Together (FIT) Trail for Weight Loss in Minority Youth. The goal of this project is to conduct a randomized controlled efficacy trial to address the problems with past studies by 1) making the face-to-face group intervention shorter, 2) using an on-line component to compliment the group-based intervention for increasing dose, and by 3) tailoring a motivational and parenting skills program directly to parents and adolescents skill levels and cultural background.

Role: Co-Investigator: Subcontract PI

03/01/2012–02/28/2017

NIH/NCI (1-R01-HD067314)

(PI: G. Alexander)

Encouraging Young Adults to Make Effective Nutrition Choices: MENU Gen Y Study. The goal of our study is to increase daily intake of fruit and vegetables (FV) for young adults, those ages 21 – 30 known as “Generation Y”, using features that appeal and are relevant to this group.

Role: Co-Investigator

04/01/ 2015–09/30/2016

RFP-SSNR-02-2758/OCBH

S. Woolford (PI)

MPOWER-Bahamas: Development of Pediatric Comprehensive Weight Management Clinics in The Bahamas. Develop a comprehensive care model for obese and overweight children 2-17 years of age.

Role: Co-Investigator

09/01/12 – 08/31/17

NIH/NCI (1P01 CA163233-01A1) (PI: Katz)

Core C Project

The Challenge of Individualizing Treatments for Patients with Breast Cancer. We will design an online intervention to improve physician communication skills related to treatment decision-making for breast cancer patients.

Role: Core PI

07/01/14 – 06/30/19

09/01/14 – 08/31/17

Department of Transplantation (1R39OT26992-01-00)

Integrating Organ Donation in Evidence Based Programs. Design and evaluate an organ donation intervention integrated into chronic disease management program.

Role: PI

09/01/11 – 05/31/16

R01-HL-109101 (PI: Robbins)

NIH/NHLBI to Michigan State University

Girls On The Move Intervention. In this study to increase physical activity among low income adolescent girls, we provide high level scientific consultation regarding study design, health communications, motivational interviewing and implementation

Role: Co-I; Subcontract PI

6/01/12 - 5/31/18

NCI P30 CA46592 Cancer Center Support Grant (PI: Lawrence)

The core grant supports the senior leadership, programs and shared facilities of the Cancer Center. The Center provides the organizational framework to promote interdisciplinary research through the development of defined clinical, basic science and prevention programs in cancer research, and the development and support of shared resources.

Role: Co-I (Director of Health Disparities)

09/01/11 – 05/31/16

R01-HD-079457-01 (PI: Amanda F. Dempsey)

NCI/NIH to University of Colorado Denver

The REDIVAC Study – Reducing Delay in Vaccination Children Study. This study will develop a tailored intervention addressing parental barriers to vaccinating their children. We provide the tailored intervention from the Michigan Tailoring System (MTS), a CHCR-developed open source technical platform that promotes ease of authoring and dissemination individually tailored interventions.

Role: Co-I

07/01/13 – 04/30/18

1-R01-CA172283-01A1 (PI: R. Davis)

NIH/NCI to University of South Carolina/HHS

Addressing acquiescence: Reducing survey error to promote Latino health. We will provide input on the study design, the development of assessment instruments (particularly concerning health behavior theory variables), the construction and pretesting of anchoring vignettes, qualitative and quantitative data analyses, interpretation of study findings, manuscripts, and presentations of research findings.

Role: Co-Investigator

09/01/12 – 08/31/17

NIH (1P01 CA163233-01A1) (PI: Katz)

Project 3

The Challenge of Individualizing Treatments for Patients with Breast Cancer. Work closely with the principal investigator and study team to design decision aid to assist women with breast cancer to make quality treatment decisions.

Role: Co-I

09/30/10 – 05/31/16

R01-HD-064770-03 (PI: Moseley)

OD020402-01

NIH Office of Director Transformative Research Award (PI: Resnicow; recommended for funding but not yet funded)

Chaotic Intervention for Health Behavior Change

Major Goals: To conduct two studies using a fractional factorial design to test the impact of varying key elements of smoking cessation counseling, determine patient factors, i.e., treatment moderators, that predict for whom the candidate “variations” are most effective, and extend the initial findings from aims 1 and 2.

Role: PI

04/01/16 – 03/31/21

NIH/University of Minnesota (PI: Hee Lee)

Mobile App for HPV Vaccination Promotion in Underserved

Asian American Women

Major Goals: Develop and design messages for the apps, assist in the selection and development of measures, and consult on the design of recruitment and retention strategies and data analyses, as well as participate in manuscript preparation.

Role: Co-I

04/01/16 – 03/31/21

NIH/Michigan State University (PI: Resnicow)

Guys/Girls Opt for Activities for Life (GOAL) Trial

Major Goals: The proposed project will benefit from a robust and refined project development lifecycle, established by the CHCR and based on quality principles, that guides all planning, development and implementation activities.

Role: PI

04/01/16 – 03/31/21

NIH (PI: Resnicow)

Obesity surveillance in South African teens

Major Goals: The aims will be accomplished by conducting a school-based assessment of approximately 8,500 adolescents, comprising 7,400 from 200-220 high schools and 1,100 out of school youth.

Role: PI

09/01/16 – 08/31/21 **NIH** (PI: Resnicow)

Implementation of BMi2 in U of M Clinics: An effectiveness study

Major Goals: We will explore BMI percentile among the subsample of youth exposed to the intervention. The proposed study will test the effectiveness of a modified version of the BMi2 intervention disseminated through the entire network of University of Michigan pediatric (9) and family medicine (5) clinics. The primary aim will be to determine the impact of the intervention (change in BMI percentile) on the entire population of overweight and obese youth ages 3-10 in these 14 clinics.
